1. PRODUCT OVERVIEW

FIELD	VALUE
Product Name	Auto-Apply Agent
Manufacturer	Unknown
Part Number	56c8ebf64ace4c97a8269139bc76e2b8
Description	A fully autonomous, multi-agent pipeline that researches the target company/lab, retrieves relevant GitHub projects using RAG, dynamically customizes a LaTeX resume, and writes a hyper-personalized cold email—all with zero human intervention.

2. INDUSTRY DETECTION

FIELD	VALUE
Industry	software
Product Domain	applications
Product Family	IT infrastructure
Document Type	product document
Confidence	85%
Reasoning	Not provided by model

3. EXTRACTED ATTRIBUTES

ATTRIBUTE	VALUE	UNIT	CONFIDENCE	SOURCE
Problem	Manual cold emailing is extremely time consuming. Generic mass emails have low response rates and lack the personalization needed to be noticed by the recruiters and professors.		65%	Manual cold emailing is extremely time consuming.
Solution	A fully autonomous, multi-agent pipeline that researches the target company/lab, retrieves relevant GitHub projects using RAG, dynamically customizes a LaTeX resume, and writes a hyper-personalized cold email—all with zero human intervention.		65%	A fully autonomous, multi-agent pipeline that rese
Architecture & Flow	Smart Profiling & Routing: Automatically distinguishes between Companies and Startups altering the entire pipeline's behavior. Agentic Research: Analyzes target (company), industry, tech stack, and hiring focus and returns a json output. RAG-Retrieval: Uses FAISS and MiniLM to semantically match the company's tech stack against my cached GitHub repositories. Resume Generation: Gemini 2.5 Flash writes a highly customized resume tailored to the target company, using all the context and research gathered by the previous AI nodes. Fallback Safety: Built-in dry-run fallbacks and LLM retry loops ensure the pipeline never crashes mid-execution. Evaluation Metrics: FAISS similarity search between "Target company profile" and "Resume chunks" between [-1 to 1] Resume quality check evaluation : " LLM as a Judge" (feeding the complete resume.tex as a prompt to the LLM (Qwen) Resume score : score >7 = pass , score <7 = retry and if retry count >2 = fail 4.Optional flags like company priority (HIGH >=70 pts & LOW <70pts) : company size <100 = +30 pts >100 = -12pts contact title (ceo , ceo, lead, HR etc) : +12 pts list quality (unverified/ scraped) : -15 pts Optional flags like company priority (HIGH >=70 pts & LOW <70pts) : company size <100 = +30 pts >100 = -12pts		65%	Smart Profiling & Routing: Automatically distingui

4. TAXONOMY CLASSIFICATION

FIELD	VALUE
Category	Power Generation and Distribution > Wiring and Cabling > Cables and Connectors > Electrical Equipment > Wiring and Cabling > Cables and Connectors > Electrical Equipment > Wiring and Cabling > Cables and Connectors
Code	26100000

FIELD	VALUE
Confidence	85%
Reasoning	Not provided by model

5. VALIDATION RESULTS

Status: PASSED Errors: 0 Warnings: 0

6. CONFIDENCE SCORING

Record Confidence: 82% Total Attributes: 4 High Confidence (>=70%): 0 Medium Confidence (40-70%): 4 Low Confidence (<40%): 0

7. SAFETY AND COMPLIANCE RISK RADAR

No safety/compliance risks detected.

9. AUTO-GENERATED PRODUCT ONE-PAGER

Product Overview: - **Product Name:** Auto-Apply Agent - **Manufacturer:** Unknown - **Part Number:** 56c8ebf64ace4c97a8269139bc76e2b8 - **Description:** A fully autonomous, multi-agent pipeline that researches the target company/lab, retrieves relevant GitHub projects using RAG, dynamically customizes a LaTeX resume, and writes a hyper-personalized cold email—all with zero human intervention.

Key Specifications: | Attribute | Value | Unit | | --- | --- | --- | | Problem | Manual cold emailing is extremely time consuming.
